2. Citations and explanations

The present invention relates to a synergistic fungicidal mixture of a first active ingredient (triazolopyrimidine of formula (I)) and of a second active ingredient (imidazole derivative of formula (II)).

D1 describes synergistic fungicides containing (II) but in conjunction with active ingredients that differ markedly from (I).

D2 describes synergistic fungicides containing a first active ingredient including (I) but in conjunction with active ingredients that differ markedly from (II).

D3 describes (I) per se and as a fungicide.

None of the citations discloses the claimed compositions. Furthermore, since the aspect of synergy in general terms was essentially unforeseeable a priori, a person skilled in the art would not have expected a synergistic effect of this kind.

The present application therefore satisfies the criteria in PCT Article 33(2) to (4), because the subject matter of
